The 3P Technik Arcado's unique modern design makes it the ideal water tank for use in any style of decoration. The Arcado rainwater tank has a stone pillar fountain appearance that looks great in your garden all year round. It's compact design boasts a capacity of 95 gal. Available in three attractive colors and with a removable lid - the Arcado line is a very versatile water tank. The high quality design has inset brass connection points for attaching a tap and linking tanks together. The Arcado can be filled with rainwater by using a 3P Filter Collector. Water can be extracted through an attached tap (included), or using the side outlets.

Includes brass spigot

Made of food quality polyethylene

German made, high quality construction

UV protection from sunlight

Links to other barrels/tanks for increased capacity

Reduces water costs and the strain on water consumption

Provide your plants with natural rain water
